PROJECTS

Smart Campus Complaint Portal

Jul 2026 – Aug 2026

- Developed a web-based platform for students to submit, track, and manage campus complaints with image uploads and real-time status updates.
- Implemented secure authentication, role-based dashboards, and complaint workflow management using React.js, TypeScript, Tailwind CSS, and Supabase.

ResumeAI – AI Resume Builder & Analyzer

2026

- Built an AI-powered platform to create professional resumes and analyze them for ATS compatibility, skills, formatting, and improvement suggestions.
- Implemented AI-assisted content generation and multiple resume templates to help users create job-ready resumes.

InterviewAI – AI Interview Preparation Platform

2026

- Developed an AI-powered mock interview platform that generates role-specific questions, evaluates responses, and provides personalized feedback.
- Designed an interactive interview experience to improve users' technical preparation, communication, and interview confidence.

Krushu Mitra – AI Agricultural Assistant

2026

- Developed an AI-powered agricultural assistant providing farmers with crop guidance, farming information, and problem-solving support through a conversational interface.
- Focused on accessible, user-friendly assistance using AI and multilingual interaction for practical agricultural needs.
